

Custom Exception

Write a java program to create a custom exception.

Mr. Pradeep is very fond of programming in Java. Therefore, he hates c++. Write a program to throw an exception if the word(string) c++ is entered.

Sample input and output 1:

Enter a string :

C++

Inside catch block.

String val is C++

Sample input and output 2:

Enter a string :

c++

Inside catch block.

String val is c++

Sample input and output 3:

Enter a string :

Java

No Exception.

String val is Java
